Ex-Program:

Project_name : References_App3

packages,

p1 : BookDetails.java

```
package p1;
public class BookDetails {
    public String bCode,bName,bAuthor;
    public float bPrice;
    public int bQty;
    public void getBookDetails() {
        System.out.println("====BookDetails====");
        System.out.println("BookCode:"+bCode);
        System.out.println("BookName:"+bName);
        System.out.println("BookPrice:"+bPrice);
        System.out.println("BookQty:"+bQty);
    }
}
```

p1 : CreateBook.java

```
package p1;
public class CreateBook
{
    public BookDetails create(String bCode,String
bName,
        String bAuthor,
        float bPrice,int bQty)
    {
        BookDetails bd = new BookDetails();
        bd.bCode=bCode;
        bd.bName=bName;
        bd.bAuthor=bAuthor;
        bd.bPrice=bPrice;
        bd.bQty=bQty;
        return bd;
    }
}
```

p1 : DisplayBookDetails.java

```

package p1;
public class DisplayBookDetails
{
    public void dis(BookDetails bd)
    {
        bd.getBookDetails();
    }
}

```

p2 : DemoRef3.java(MainClass)

```

package p2;
import java.util.*;
import p1.*;
public class DemoRef3 {
    public static void main(String[] args) {
        Scanner s = new Scanner(System.in);
        System.out.println("Enter the BookCode:");
        String bC = s.nextLine();
        System.out.println("Enter the BookName:");
        String bN = s.nextLine();
        System.out.println("Enter the BookAuthor:");
        String bA = s.nextLine();
        System.out.println("Enter the BookPrice:");
        float bP = s.nextFloat();
        System.out.println("Enter the BookQty:");
        int bQ = s.nextInt();

        CreateBook cb = new CreateBook();
        BookDetails bd = cb.create(bC, bN, bA, bP, bQ);
        //Method returns BookDetails-Object reference

        DisplayBookDetails dbd = new
DisplayBookDetails();
        dbd.dis(bd);
        //Method is passed with BookDetails-Object
reference
        //as parameter
        s.close();
    }
}

```

}

o/p:

Enter the BookCode:

A111

Enter the BookName:

CoreJava

Enter the BookAuthor:

XYZ

Enter the BookPrice:

1234.56

Enter the BookQty:

12

====BookDetails====

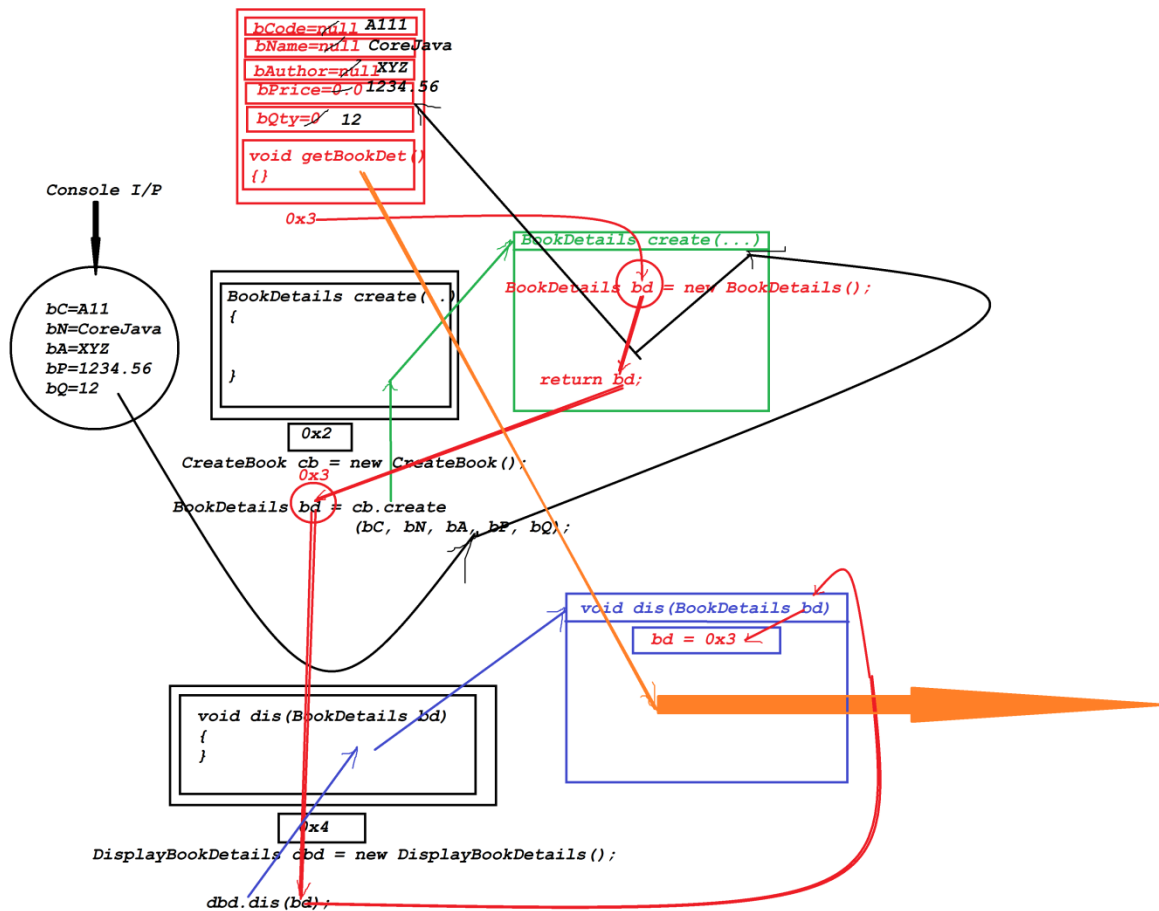

BookCode:A111

BookName:CoreJava

BookPrice:1234.56

BookQty:12
