### Dt: 11/12/2023

## **Summary Diagram:**

======

# faq:

define addCookie()?

```
=>addCookie() method is from HttpServletResponse and which is used to add
  Cookie-Object to response.
Method Signature of addCookie():
public abstract void addCookie(javax.servlet.http.Cookie);
syntax:
res.addCookie(ck);
 =>This addCookie() method will perform serialization process, which means
converts
  Cookie-Object into Stream.
=====
faq:
define getCookies()?
 =>getCookies() method is from HttpServletRequest and which is used to get all
  cookies from the request object.
Method Signature of getCookie():
public abstract javax.servlet.http.Cookie[] getCookies();
syntax>
Cookie c[] = req.getCookies();
 =>getCookies() method internally perform De-Serialization process, which
means
  convers Stream into Objects
```
